PROFESSIONAL SUMMARY

I am a Senior iOS Developer with over 7+ years of expertise, specializing in the design, development, and testing of iOS applications within the On-Demand Delivery, Transportation, Warehouse Management System (WMS), Telecommunications, E-commerce, and ERP domains. My focus has been on crafting robust solutions for iOS platforms, catering to a user base in the millions.

Throughout my career, I have been actively engaged in managing various overseas enterprise projects, necessitating consistent client communication and the implementation of continuous integration and delivery practices. I excel as a team player, demonstrating proficiency in both collaborative team environments and self-directed settings.
